

# John Gill Mandarin Immersion Program

The John Gill Mandarin Immersion Program started in 2015, and in just 3 years, we have tripled the number of participating students and built an incredible community that collaborates and supports this program. Did you know that there are over 1 billion speakers of Mandarin, the most spoken language in the world? This is the place where your child will learn the Chinese language and be enriched by the Chinese culture. The John Gill MI Program provides a rigorous and innovative educational curriculum, while preparing our students to become future leaders.

Interested in learning more about our unique, public Mandarin Immersion Program and what it offers? Come meet our families and get your questions answered! Is it the right program for my kids? What does the curriculum look like? How is it different from private immersion schools?

Join us at one of the following events!
